Model as a compass...

- which guides the "anthropological approach"
- which raises specific questions
- which is based on qualitative data from interviews and workshops

Model as a platform for ideas

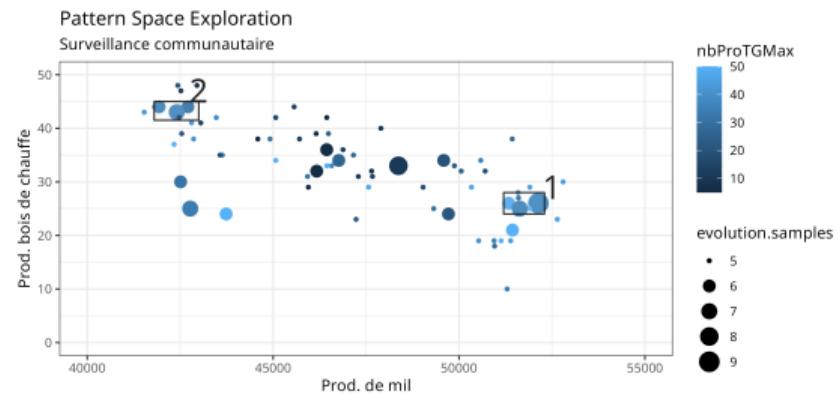

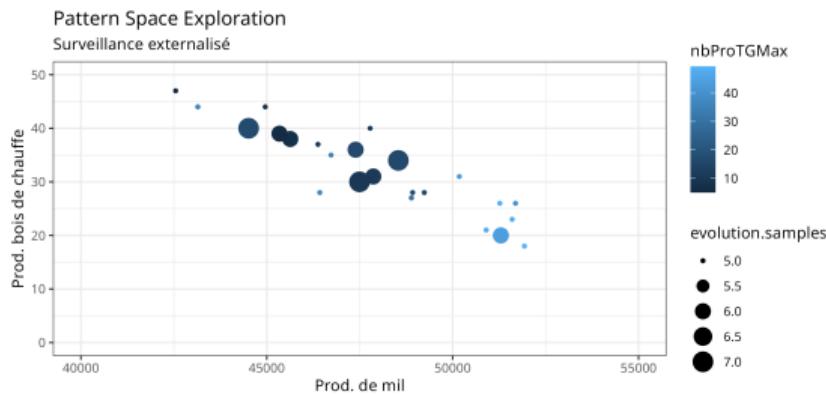

- raises non-intuitive questions,
- feeds a global vision of the subject (Actor Network Theory)

Questioning viability !

Support Diohine agro-pastoralists in their governance of *Faidherbia Albida* trees.

To conclude

- A sight on environmental protection, revealing local tensions
- More a problem of tree regeneration than local monitoring
